NO JACK REQUIRED

(or a Mike, Dave or John)

- **JUST A 1/4 TURN SEALS & INFLATES**

We all dread the nightmare scenario of a roadside puncture and it always seems to happen at night, when it's raining with no signal on your mobile?

- **RE-INFLATES THE TYRE IN SECONDS**

Well now there's a simple solution! Super quick and easy to use, Holts Tyreweld coats the inside of the tyre, temporarily sealing the puncture and re-inflating the tyre in seconds, so you can drive clean away, no tools required. The tyre can then be repaired permanently at your nearest National Tyres branch.

- **NO TOOLS REQUIRED**

So now there's no need to call a man who can, just carry a can that can.
